

SUITABLE FOR: TORROJA, PAXTON, CODERCH, GAUDÍ AND MIES

TF-20 FIXATION SYSTEM

Providing a means of tensioning the mesh, the TF-20 Fixation system utilizes a perforated flat bar that matches the spiral wire pitch. The spiral mesh is linked to the flat bar and become one. Tensioners are then welded to the flat bar as a means of providing the tensile load. All materials are made form AISI316 stainless steel material. A Powder coated finish can be applied upon request. The TF-20 fixation system is applicable to the following mesh patterns: Torroja, Paxton, Coderch, Gaudí and Mies.
