

TF-30

SUITABLE FOR: EIFFEL, TORROJA, CODERCH, GAUDÍ, PAXTON AND MIES

TF-30 FIXATION SYSTEM

Providing a means of tensioning the mesh, the TF-30 mounting system uses a flat bar that is inserted inside the spirals at both the top and bottom horizontal edges. Holes are provided at equidistant spacing along the bar where a clevis and pin connect and provide the load. All materials are made from AISI 316 stainless steel material. A powder coated finish can be applied upon request. The Flat Thread flexible mesh mounting system is applicable to the following mesh patterns: Eiffel, Torroja, Gaudí, Coderch, Paxton and Mies.
