

TF-40

SUITABLE FOR: MIES AND PAXTON

FIXATION SYSTEM TF-40

The TF-40 fixation system is made of a heavy-duty galvanized rail with internal carriages that allow the draped flexible wire mesh to be loosely gathered together or fully expanded. Flexible mesh attaches to the carriages by a hook through a grommet at the top of the mesh. The hooks are available in 30 mm, 40 mm and 50 mm sizes. A curved configuration is possible with a minimum of a 2.5 m radius. The rail can be powder coated in a variety of colors, or shipped raw.
