

TF-80

SUITABLE FOR: MIES, SERT AND SERT WAVE

TF-80 FIXATION SYSTEM

The TF-80 fixation system is comprised of straight profiles at set intervals with rotating hooks that attach to a carriage inside of a heavy-duty zinc galvanized rail. This system allows the flexible mesh to collapse and condense in a uniform arrangement satisfying many aesthetic and functional needs. The rail and straight profiles can be powder coated in a variety of colors, or shipped raw.
